

End to End ERP Implementation

Client Business Objective:

Business needs necessitate a strategic investment in IT through a new ERP implementation.

Aplica Service Focus:

AGILE methodology, Streamlining of process work-flows, functional excellence, productivity improvements and a consequent competitive advantage, focussed management reporting to aid strategic decision making.

The decision to invest in an ERP is a big organizational decision and we help our clients in maximizing their return on this investment. Our designs are made following a deep appreciation of the client needs with a view to facilitate ease of business operations and allow for scaling at a later date and provide for business data transparency. The implementation focus is on timely delivery & high quality deliverables.
