

Support and Upgrade Services

Client Business Objective:

Software driven upgrade/support needs or scale/scope expansion

Aplica Service Focus:

Technical expertise for complex support and upgrade execution, business process understanding and IT execution for scope expansion and hardware/software resource consulting/implementation for scale.

The choice of the right partner for support and upgrade of existing ERP systems determines whether a client gets a seamless upgrade experience, which minimizes down time and plugs existing inefficiencies with the upgrades. We understand the complexity of such an engagement and plan support/upgrade for our clients with minimal disruption and with a view to improve business functioning.
